INTRODUCTORY NOTE.

This Volume contains 57328 entries of titles of papers by 10089 Authors from the beginning of the letter I to Marbut.

The total number of entries printed for the period 1884—1900 is now brought up to 222428 as follows:—

	Authors	Entries
A	2001	11551
B	6928	40169
C	4351	24994
D	3072	17665
E	1368	7750
F	2846	16367
G	3716	20581
H	4717	26023
I	351	1695
J	1372	7308
K	3187	18956
L	3899	22591
M (uncompleted)	1280	6778
	39088	222428

The members of the Staff upon whom now devolves the task of the final stage of preparing the remaining slips for the press and of proof-reading are Miss Vagner, Miss Barnard and Miss Chapman. The Committee acknowledges with grateful thanks the zeal and ability which they continue to show in carrying out their duties.

The Committee desires also once more to put on record its indebtedness to the Syndics of the Cambridge University Press for their unceasing care and efficiency in carrying out their part of this great undertaking.

Since the retirement of Dr. Herbert M^{c}Leod, F.R.S., in 1915, as Director, which was alluded to in the Introductory Note of Volume XV, he has nevertheless continued to help the Committee with advice as occasion demanded. The place of Chairman of the Committee was filled

by Prof. Silvanus Thompson, F.R.S., who brought to his duties that ever courteous and tactful enthusiasm for work, for which he was so well known. Almost his last act before his lamented death in June, 1916, was to correct and pass for press the Introductory Note which prefaced the volume which precedes this. The Committee desires to gratefully acknowledge the high services he rendered, and to join in the universal and deep regret felt at the loss to the world of so great a man of science, so loving a personality, and such a faithful servant to the Royal Society.
